FASTENING SYSTEMS OVER THE YEARS

The continuous hanger is the only fastening system that leaves gutters strong and rigid along their entire length. It eliminates the weaknesses that other systems generate between nails and spaced hangers.

PROTECT YOUR INVESTMENT AGAINST:

PINE NEEDLES

LARGE DEBRIS

SNOW AND ICE

eclipse™ TECHNOLOGY

The double membrane keeps debris from getting inside the gutter. The offset holes make it the perfect filter, allowing water to drain freely while blocking pine needles and leaves without ever getting clogged.

vortex™ TECHNOLOGY

The suction created by the two membranes makes it possible to drain three times more water than recorded in the heaviest storms. The inner membrane draws water through the wider holes.
